

INTRODUCTION

The International Conference on Glass Producing Machines is a traditional conference which is held once every three years in the town of **Liberec**. The Czech Glass Society and the Department of Glass and Ceramic Producing Machines at the Technical University of Liberec cordially invite you to participate in the 12th International Conference on Glass Producing Machines held **on September 19-20, 2006**.

The conference is focused on the exchange of knowledge and experience about the development and application of glass processing machines, automatic production lines, constructive modulus, components of production machines and processing plants as well as handling equipment and peripheries.

The conference aims to acquaint technically - minded members of the public with activities, problems and perspectives of producers and users of glass producing machines.

Company's presentations of glass production machinery, machine parts, software production and other services for the glass industry will also be a part of the conference.
